EXPERIENCE

Pantheon Systems - San Francisco, CA   **Dec 2020 - Present**
Software Engineer II   **Promotion**
- Developed frontend UX experiments using React and LaunchDarkly for Product and Design leads; increased user engagement with new features by 30%
- Spearheaded efforts to create a React and CSS code style guide for the main application to unify the codebase across various teams and cut large feature code review time in half
- Identified and promoted new security measures to eliminate 95% of bot account signups and reduce $100k average monthly cost

Software Engineer I   **Promotion**
- Bolstered various teams to meet important feature deadlines
- Helped migrate important features from the legacy codebase in CoffeeScript to React
- Supported senior engineers during our technical interviews by helping guide candidates through our test application codebase

Associate Software Engineer
- Joined the platform on call rotation - a volunteer team of engineers dedicated to triaging events that affect the entire platform - and successfully managed 10+ incidents
- Collaborated with the Design and Product teams to translate UX mockups into responsive features using React, JavaScript, Tailwind, and GraphQL

Internet Brands - Pleasanton, CA   **Jan 2019 - Nov 2019**
Associate Web Developer   **Promotion**
- Redesigned lead unit testing software to scale with company API and cut testing time by 23%
- Collaborated with client account managers and tech representatives to streamline the client software integration process which decreased processing time by 20%
